

Backhoe(LW)

The LW series backhoe is a strong design, it is used for ditching in farms and grazing lands, digging pool, cleaning water ways as well as assistant excavating work in construction and building roads.

Hydraulic transmission is used, featured with compact structure, flexibility. Convenient operation and quick mounting and dismounting. It uses hydraulic oil commonly with tractor. The hydraulic elements are standardized, convenient for operation and service. To better accomplish different kinds of work, buckets of different sizes can be selected and mounted on it.
