Einfluss der Vorbehandlung

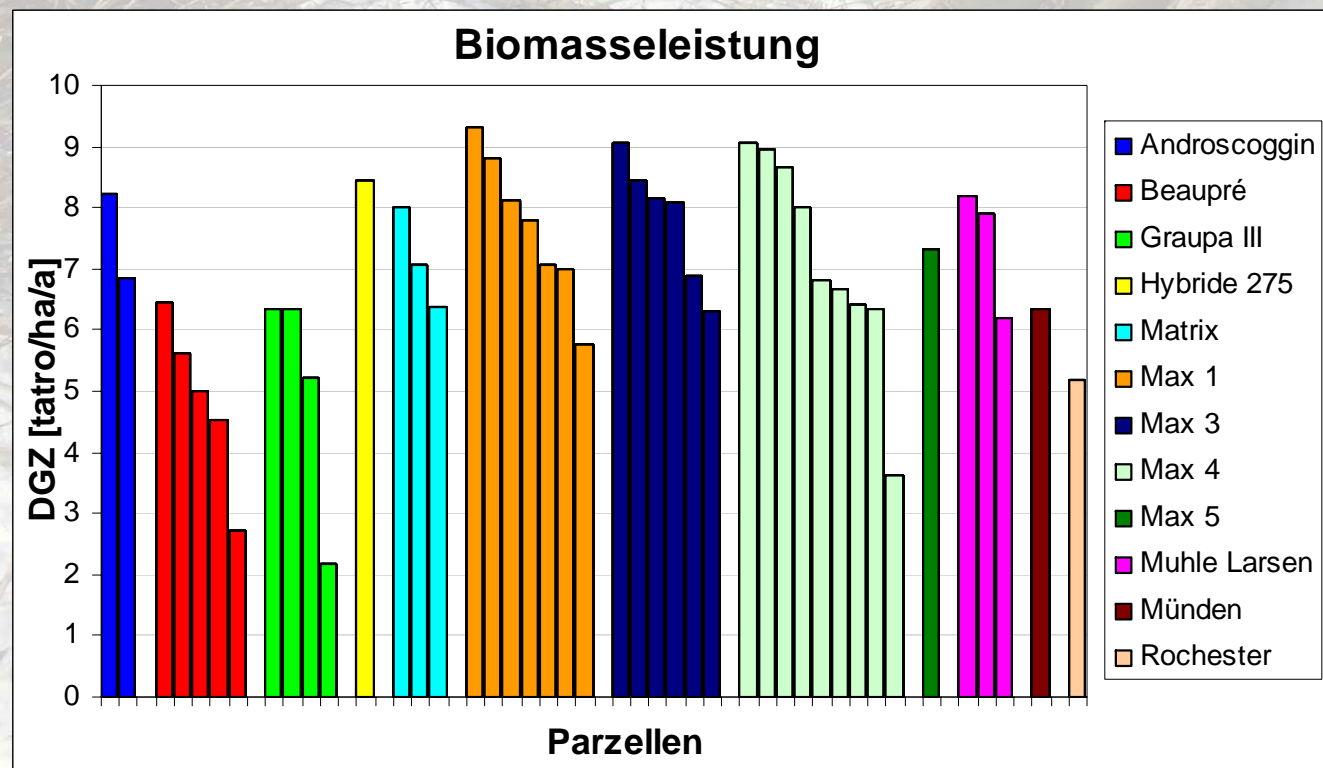

Einfluss der Zäunung

Gesamtvorrat

1460 VfmD = 14,6 fm/ha/a

700 Tonne (atro) = 7 t/ha/a

A photograph of a pile of cut logs and branches on a snowy ground. The logs are stacked in a pile, with several cut ends visible, showing the light-colored wood. The branches are thin and dry, scattered around the logs. The ground is covered in a layer of snow. The text "Vielen Dank für Ihre Aufmerksamkeit" is overlaid in yellow on the image.

**Vielen Dank für Ihre
Aufmerksamkeit**
